

PS|SHIP™

LABEL SERVER

The smart way to prepare, track, and charge back.sm

Introducing PS|Ship, the easy, efficient, and error-free way to create shipping labels, track shipping data, and validate charge-back information—right from your desktop.

PS|Ship automates and simplifies the entire shipping process by linking contact manager data, shipping vendor services, and billing systems through a single, unified, web-based interface.

No other tool set is as smart or comprehensive as PS|Ship. And no other solution can save you time and money every time you make a shipment.

PS|Ship saves you time and money with every shipment you make. 

EASY PREPARATION

With two clicks, you can produce a shipping document and integrate it seamlessly into secretarial workflow and existing CRM and e-mail systems.

EFFICIENT TRACKING

Shipments can be tracked effortlessly in a concise and uniform fashion—meeting the needs of both end-users and the shipping department.

RELIABLE CHARGE BACK

All client information is validated during label generation—creating a streamlined charge back process that ensures accurate cost recovery.

Who Uses PS|Ship?

PS|Ship is designed especially for professional services firms (e.g., law, accounting, financial, advertising, management consulting, etc.) who bill back shipping expenses to external clients and internal cost centers.

A Fully Integrated, End-To-End Solution.

PS|Ship is a state-of-the-art web-delivered application that is fully integrated with Microsoft Outlook®, Lotus Notes® and most CRM solutions. It validates billing information against your own accounting system, and accurately allocates shipping expenses to the appropriate client. In addition it offers integrated UPS Online® Tools, allowing you to create labels and obtain current tracking data quickly and easily.

PS|Ship is much more than an add-on or luxury to the back office. It is a fully accountable, end-to-end solution that integrates all the workflow associated with preparing, tracking, and billing your shipments—meeting the mutual business requirements of the end-user, mail room, accounting department, and shipping vendor.

*In short,
PS | Ship is
what efficiency
is all about.* 

**PSISHIP IS THE
OBVIOUS CHOICE.**

Single, unified interface

Universal web-based access and support

Integrates into your workflow

Easy set-up, training, and use

Reduces data entry time

Fast, error-free tracking

*Reduces billing errors and
shipment delays*

Achieves high cost recovery

Create Labels Easily and Efficiently.

PSIShip transforms time and labor-intensive chores into a streamlined process by transferring shipping information from your CRM or Outlook database into a laser-printable shipping label while simultaneously recording the tracking and billing information.

By replacing the age-old, error-prone process of manually creating shipping labels, PSIShip saves considerable time for secretaries and mail room clerks—each time they create a label. With the elimination of redundancies, omissions, and transcription errors, you're guaranteed an immediate reduction in the number of shipment delays.

Validate Billing Information Automatically.

By capturing and validating all the contact and billing information necessary to ship and charge back expenses, every transaction in PSIShip is error-free. No data re-entry is required. And no revenue slips through the cracks. Easy access to shared client information and matter numbers ensures that your shipping charges will be verified, uploaded, and routed correctly every time.

Recover Your Costs Quickly and Accurately.

By automatically tracking shipping costs and tying them to client accounts, PSIShip ensures highly accurate billing records. The resulting benefit: PSIShip can save you money by recovering more of your shipping expenses. Better yet, the application pays for itself in a short period of time.

Manage The Shipping Process With Complete Certainty.

From a secretary who creates the shipping label to a CFO who watches the bottom line, PSIShip is the smart way to manage the entire shipping process. It makes shipping fast, easy, and efficient, and delivers a return on your investment in a matter of months. It gives you an indispensable tool to track all shipping concerns right from your desktop, and a tightly-integrated solution that works in tandem with the office systems you already have in place. In short, PSIShip is what efficiency is all about!
